

Share the \$avings Contest

Guidelines:

Between April 24th and June 24th, Sustainable North Castle is encouraging residents and businesses in North Castle to share their success stories about saving money by reducing energy use in our \$hare the \$avings Contest.

The purpose of this contest is to share information that can be replicated by others, so that we can all work toward saving money as we reduce our individual and collective 'carbon footprint' in North Castle.

The winner will receive \$100, to be awarded after the judging process is completed in July.

Sustainable North Castle will determine the winning entry and any honorable mention entries using the following criteria:

- Amount of savings and energy use reduction
- Documented results from actions taken

In your story, please describe the action(s) taken, any materials purchased to take action, cost, and where purchased. Also include:

- Why you decided to do this
- The benefits and challenges of what you did
- Lessons learned

Entries can be made in writing or by video. They can be emailed to us at **sustainablenorthcastle@gmail.com** or posted on our **Sustainable North Castle Facebook page**.

Written entries should be no more than 300 words and videos should be no longer than three minutes. We encourage details and creativity in your presentation!
