RPRC DETERMINATION LETTER

Project Name: COWELL - Exterior Modification
Street Location: 85 HICKORY KINGDOM RD
Zoning District: R-2A Property Acreage: 4.62 Tax ID: 95.04-1-40
RPRC DECISION: ☐ Requires Planning Board Review ☐ Requires Architectural Review Board
☐ Requires Conservation Board ☒ Requires Zoning Board of Appeals
☐ Submit to Building Department ☒ Requires Admin Wetlands Permit
Date: April 8, 2015

The above referenced application was reviewed by the Residential Project Review Committee (RPRC) on April 7, 2015.

The Committee determined that Planning Board and Architectural Review Board approval of the proposed project is NOT REQUIRED.

However, the following issues will need to be addressed prior to the issuance of a building permit:

- Barn Siding or stone shall be provided on the garage door side in order to reduce foundation reveal.
- The site plan should be revised to depict the building envelope
- The Applicant will need a front yard variance
- Existing shed, between the house and the detached garage, appears to be in front yard which is not permitted. The Building Department will need to review the location of the shed.
- Provide a detail for the proposed driveway sections and walkway.
- The applicant shall perform deep and percolation soil testing to be witnessed by the Town Engineer. The test locations and results shall be shown on the plan. Contact the Town Engineer to schedule the testing.
- Provide stormwater mitigation and design calculations for the runoff generated by the 25-year storm for the net increase in impervious surface. Provide details of the stormwater mitigation system.
- Provide rims, inverts, size and material for all drainage facilities. Provide details.
- A Tree Permit will be required.
- It appears that disturbances are proposed within the locally-regulated 100 foot wetland buffer and the NYSDEC 100 foot wetland adjacent area. A local Administrative Wetland Permit and/or NYSDEC Freshwater Wetland Permit may be required. The applicant shall illustrate the local and NYSDEC wetland boundary and regulated 100 foot buffer on the plan for verification by the Town Wetland Consultant and NYSDEC validation. Notify the Town Engineer once the wetland boundary has been established in the field.

- The plan proposes disturbances and improvements within the regulated 100 foot wetland buffer. The applicant shall provide mitigation of the buffer disturbance at a ratio of 2:1. Provide a wetland mitigation plan for review by the Town Wetland Consultant and the NYSDEC if required.

At this time you may coordinate directly with the North Castle Building Department. **DO NOT START CONSTRUCTION WITHOUT A VALID BUILDING DEPARTMENT PERMIT.**

If you would like to further discuss this matter, please do not hesitate to contact the Building Department.
