## NOTES.

- JMC Planning, Engineering & Land  
Architecture & Land  
Development
- ING CONDITIONS DEPICTED ON THIS PLAN HAVE BEEN TAKEN FROM  
EY TITLED, "TOPOGRAPHIC AND UTILITY SURVEY," PREPARED BY JMC,  
DATED NOVEMBER 26, 2019.
- TECHNICAL BORING/TEST PIT LOCATIONS DEPICTED ON THIS PLAN WERE  
N FROM A FIELD INVESTIGATION CONDUCTED BY JMC, PLLC ON  
/2019.
- WETLAND LIMITS DEPICTED ON THIS PLAN HAVE BEEN FIELD DELINEATED  
COLOGICAL SOLUTIONS, LLC ON 10/17/2019.
- YEAR FLOOD PLAIN ELEVATION 370 PER FEMA NATIONAL FLOOD HAZARD  
PANEL #36119C0277F EFFECTIVE 09/28/2007.
- PLAN IS FOR TEMPORARY EROSION AND SEDIMENT CONTROL INFORMATION  
MATERIALS STOCKPILING, ONLY.
- R TO BEGINNING ANY STOCKPILING, ALL EROSION AND SEDIMENT CONTROL  
URES SHALL BE INSTALLED IN ACCORDANCE WITH ALL THE PLANS AND  
IFICATIONS. EROSION AND SEDIMENT CONTROL MEASURES SHALL BE  
TAINED UNTIL THE SITE IS STABILIZED.
- CONTRACTOR SHALL INSPECT AND MAINTAIN ON-SITE EROSION AND  
IENT CONTROL MEASURES ON A DAILY BASIS. ALL COLLECTED SEDIMENT  
N SEDIMENT BARRIERS SHALL BE REMOVED PERIODICALLY AS REQUIRED TO  
TAIN THE FUNCTION OF THE SEDIMENT BARRIERS. ALL SEDIMENT  
ECTED SHALL BE RESPREAD ON-SITE WITHIN STABILIZED AREAS AS  
CTED BY THE OWNERS REPRESENTATIVE.
- CONTRACTOR SHALL INSPECT DOWNSTREAM CONDITIONS FOR EVIDENCE OF  
ENTRATION ON A WEEKLY BASIS, AFTER EACH RAINSTORM, AND AS MAY  
EQUIRED OR DIRECTED BY ALL APPLICABLE APPROVALS AND PERMITS. THE  
RACTOR SHALL IMMEDIATELY PROVIDE A WRITTEN REPORT ON FINDINGS OF  
ENT IN DOWNSTREAM AREAS TO ALL AUTHORITIES HAVING JURISDICTION  
AKE REPAIRS AS REQUIRED OR DIRECTED.
- ITIONAL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE INSTALLED  
HE CONTRACTOR AS REQUIRED/WARRANTED BY FIELD CONDITIONS AND AS  
CTED BY THE OWNERS REPRESENTATIVE, JMC, AND/OR ANY AUTHORITY  
IG JURISDICTION.
- SKIPPING OF CONSTRUCTION MATERIAL SHALL BE PLACED ON-SITE IN THE  
DESIGNATED ON THIS PLAN OR AS APPROVED BY THE OWNERS  
REPRESENTATIVE. STOCKPILED EXCAVATED MATERIAL SHALL HAVE TWO ROWS  
LT FENCE LOCATED AROUND ITS PERIMETER. ALL STOCKPILED MATERIAL  
LL BE MAINTAINED IN AN ORDERLY MANNER SO AS NOT TO IMPEDE ON  
STRIAN AND/OR VEHICULAR TRAFFIC CIRCULATION ROUTES.

Armonk, NY 10504

RE: JMC Project 19124  
#100-Building 2  
100 Business Park Drive  
Town of North Castle, NY

**Response to Town Comments Submission (Fill Permit)**

Dear Chairman Carthy and Members of the Planning Board:

On behalf of the owner and applicant, A & R Real Estate Holdings LLC, we are pleased to submit the following documents for your continued review of the Amended Site Plan Application associated with fill for construction of a new warehouse building at 100 Business Park Drive:

1. JMC Drawing MSP-I “Temporary Materials Stockpiling Plan”, dated 06/22/2020.
2. “Soil Sampling Report and Microsoft Excel Spreadsheet: 75 Cooley Street, Pleasantville, NY”, prepared by Phoenix Environmental Laboratories, Inc, dated 06/10/2020.
3. “Email correspondence received from the NYSDEC (Christina Pacella), re: Permit Jurisdiction Screening”, dated 04/28/2020.

The revisions depicted on the above noted plans reflect responses to comments outlined in the Town of North Castle Planning Department memorandum, dated June 5, 2020, and the Kellard Sessions Consulting, P.C. memorandum, dated June 5, 2020. For ease of review, we have repeated and enumerated the comments in italic print, followed by our responses:

**Town of North Castle Planning Department, June 5, 2020**

**General Comments**

**Comment No. I**

*The applicant should submit a plan depicting the locations of the proposed fill. 5,000 cubic yards is a large amount of fill that may create adverse impacts. It is recommended that any temporary fill be placed in a*

*location that is not environmentally impactful and would not create visual impacts.*

*Specifically, it is recommended that the fill be located outside of any wetland or wetland buffer area, outside of a flood plain and not require the removal of existing vegetation.*

*In addition, it is recommended that the fill be placed in a location that would not impact views from the street or surrounding properties.*

**Response No. 1**

The proposed temporary soil stockpile area has been located in an area outside of a wetland, wetland buffer, several hundred feet from Business Park Drive & and neighboring properties and results in minimal existing vegetation removal. Please refer to JMC Drawing MSP-I “Temporary Materials Stockpiling Plan”, dated 06/22/2020 for more information.

**Comment No. 2**

*It is not clear whether the temporary storage of fill on the site is a permitted use in the PLI Zoning District. The only use that may cover this temporary requested use would be:*

*“Any accessory buildings or uses customarily incident to a permitted use”.*

**Response No. 2**

Comment is so noted.

**Comment No. 3**

*The site plan should be revised to indicate whether any of the fill is proposed to be located in the wetland or wetland buffer. If so, the Applicant should prepare a mitigation plan.*

**Response No. 3**

The proposed temporary soil stockpile area has been located in an area outside of a wetland, wetland buffer, several hundred feet from Business Park Drive & and neighboring properties and results in minimal existing vegetation removal. Please refer to JMC Drawing MSP-I “Temporary Materials Stockpiling Plan”, dated 06/22/2020 for more information.

**Comment No. 4**

*The site plan should be revised to depict any proposed Town-regulated tree removal.*

**Response No. 4**

The site plan depicts the removal of 1 (6” Willow) Town-regulated tree.

Comment No. 5

*The Applicant should confirm that the proposed fill plan would not reduce the existing off-street parking plan. If not, the plans should be revised to demonstrate that the site would still provide the minimum number off-street parking spaces required by the Town Code.*

Response No. 5

The temporary soil stockpile area is located in an area that would not reduce the number of off-street parking spaces.

Comment No. 6

*The site plan should depict the location of the proposed fill. It is recommended that the fill be placed in a location that minimizes visual impacts as viewed from the street and surrounding properties.*

Response No. 6

The proposed temporary soil stockpile area has been located in an area outside of a wetland, wetland buffer, several hundred feet from Business Park Drive & and neighboring properties and results in minimal existing vegetation removal. Please refer to JMC Drawing MSP-I "Temporary Materials Stockpiling Plan", dated 06/22/2020 for more information.

Comment No. 7

*The Planning Board should discuss the maximum duration of the fill storage on the property and discuss if/when fill would be required to be used or removed from the site.*

Response No. 7

Comment is so noted.

**Kellard Sessions Consulting, P.C. Memorandum, dated June 5, 2020**

General Comments

Comment No. 1

*The applicant has requested the ability to import fill material from an off-site source and temporarily stockpile it on-site for future use in the development of the proposed warehouse project, currently before the Planning Board. The anticipated duration of the temporary stockpile condition has not been described by the applicant. It is assumed that upon approval of the proposed warehouse expansion project, that construction would start shortly thereafter. The Board should discuss whether the proposed temporary stockpiling plan is appropriate and consider the potential visual and environmental impacts associated with it, as well as the possibility of an extended duration of time for stockpiling should the project not be developed in the near future.*

Response No. 1

Comment is so noted.

Comment No. 2

*The proposal to stockpile approximately 5,000 cubic yards of material will result in a substantial earthen berm/embankment. If the Board is amenable to the proposal, we would request that the applicant be required to prepare a plan for your consideration, which would illustrate and define the extents of the proposed stockpile area, the overall height of the stockpile, required tree removal and whether any screening or interim vegetation measures would be implemented.*

Response No. 2

The current plan proposes the temporary stockpiling of 1,00 cubic yards of fill. The proposed temporary soil stockpile area has been located in an area outside of a wetland, wetland buffer, several hundred feet from Business Park Drive & and neighboring properties and results in minimal existing vegetation removal. Please refer to JMC Drawing MSP-1 "Temporary Materials Stockpiling Plan", dated 06/22/2020 for more information.

Comment No. 3

*Similar to comments provided by this office with regard to the development of the warehouse expansion, the applicant will be required to demonstrate that certain minimum mitigation measures are provided with regards to environmental constraints including floodplain/floodway development, wetland and wetland buffer disturbance, tree removal and erosion and sediment control measures. Reference is made to our April 9, 2020 memorandum, which refers to various Town Code requirements, as it relates to the following:*

- a. *The project site is located partially within the FEMA regulated floodway of the Byram River and the associated 100-year floodplain with a base flood elevation (BFE) of Elevation 370.0. As such, the applicant will be required to obtain a Floodplain Development Permit, demonstrating compliance with Chapter 177 - Flood Damage Prevention of the Town Code. Any fill should not be placed within the floodway. Fill stockpiled below the base flood elevation will require compensatory storage, as required by Section 177-14 B (3) of the Town Code. We note that the Existing Flood Storage Volume Analysis Plan, previously submitted, should be revised as noted in our prior memorandum.*
- b. *The Byram River flows generally north to south along the eastern property boundary. This watercourse is a locally-regulated wetland, as well as a New York State Department of Environmental Conservation (NYSDEC) Class C(T) Stream. The 100-foot regulated buffer and adjacent area extends onto the property and potentially within the proposed stockpile area. A local Wetland Permit may be required.*
- c. *The property is located within the check-zone of two (2) adjacent NYSDEC Freshwater Wetlands, Wetlands No. G-1 and G-2. The applicant shall provide confirmation from the NYSDEC, indicating whether a Freshwater Wetland Permit is required.*
- d. *The Byram River is a Westchester County controlled stream. Any development within 100 feet of*

*its banks will require a Stream Control Permit from the Westchester County Department of Public Works (WCDPW).*

- e. *The applicant should identify those trees likely to require removal for the stockpile area and construction access. The Planning Board will need to determine whether the tree removal is appropriate for the temporary action and if any plantings/screening would be required.*
- f. *The applicant shall prepare an Erosion and Sediment Control Plan for review, illustrating and detailing temporary measures to protect the site and downgradient areas from erosion and sediment transport, construction staging and stockpile areas. Should the disturbances associated with the temporary fill plan exceed one (1) acre, the owner will be required to obtain coverage under the NYSDEC General Permit (GP-0-20-001) for Stormwater Discharge from Construction Activities.*

**Response No. 3**

- a. A grass swale is proposed to offset the floodplain storage that will be reduced as a result of the placement of the stockpile. Please refer to JMC Drawing MSP-1, "Temporary Materials Stockpiling Plan".
- b. The proposed soil stockpile area is located outside of the existing wetland and associated 100-foot wetland buffer area.
- c. Please refer to email correspondence from the NYSDEC (Christina Pacella), dated 04/28/2020, indicating that the project site is not located within the New York State protected freshwater wetland.
- d. The proposed temporary soil stockpile area is located more than 100 feet from the Byram River, therefore does not require a Stream Control Permit from the Westchester County Department of Public Works (WCDPW). The proposed activity area associated with the main project will be located within 100 feet of the Byram River and will require a Stream Control Permit from the WCDPW. Once the permit has been filed, a copy will be provided under separate cover for the Board's record.
- e. The site plan depicts the removal of 1 (6" Willow) Town-regulated tree.
- f. The site plan depicts the location and details for temporary erosion and sediment controls.

**Comment No. 4**

*As required by Chapter 161 – Filling and Grading of the Town Code, the owner will be required to provide soil manifests for all fill material delivered to the site stating the date of delivery, the origin of the fill, the type of fill and a representation that there is full compliance with 6 NYCRR, Part 360. Further, the owner will be required to hire an independent inspector, who shall be either a duly Licensed Engineer, a soil scientist or a representative of a New York State certified testing laboratory, independently provide certification that the fill delivered is in compliance with 6 NYCRR, Part 360 for Beneficial Use as General Fill. Specific reference to Part 360.13: Special Requirements for Pre-Determined Beneficial Use of Fill Material, details the required sampling protocol, analysis frequency and analytical parameters to analyze, including metals,*

*PCBs/pesticides, semi-volatile and volatile organic compounds.*

Response No. 4

Please refer to "Soil Sampling Report and Spreadsheet: 75 Cooley Street, Pleasantville, NY", prepared by Phoenix Environmental Laboratories, Inc, dated 06/10/2020, prepared by Phoenix Environmental Laboratories, Inc, dated 06/10/2020.

We trust the attached documents and above responses are sufficient for your review. Thank you for your consideration. If you have any questions or require additional information, please do not hesitate to contact our office at (914) 273-5225.

Sincerely,

**JMC Planning Engineering Landscape Architecture & Land Surveying, PLLC**

RE: Proposed Warehouse - 100 Business Park Drive  
Town of North Castle, Westchester County  
DEC Facility ID# 3-5538-00238/00001  
**Permit Jurisdiction Screening**

Dear Mr. Nowicki:

The New York State Department of Environmental Conservation (DEC or Department) has reviewed your inquiry received by this office on March 27, 2020. The project involves the construction of a 74,850-square-foot (SF), one-store warehouse building at the above-referenced address. Based upon our review of your inquiry and submitted materials, the Department offers the following comments:

#### **PROTECTION OF WATERS**

The following stream is located within or near the site you indicated:

Name	Class	DEC Number	Water Index	Status
Byram River	C(T)	LIS 13		Protected

A Protection of Waters permit is required to physically disturb the bed or banks (up to 50 feet from stream) of any streams identified above as "protected." A time restriction may be required for protection of cold-water trout fisheries (waters classified under Article 15 of the Environmental Conservation Law (ECL) with a "T" or "TS" designation), beginning October 1 and ending April 30.

If a permit is not required, please note, however, you are still responsible for ensuring that work shall not pollute any stream or waterbody. Care shall be taken to stabilize any disturbed areas promptly after construction, and all necessary precautions shall be taken to prevent contamination of the stream or waterbody by silt, sediment, fuels, solvents, lubricants, or any other pollutant associated with the project.

### **FRESHWATER WETLANDS**

The project site is not within a New York State protected Freshwater Wetland.

### **WATER QUALITY CERTIFICATION**

If the United States Army Corps of Engineers (ACOE) requires a permit for work completed in or impacting a federal wetland or waters of the U.S., you will need a Section 401 Water Quality Certification from the Department. Please contact the ACOE at (917) 790-8411 for a determination.

### **STATE-LISTED SPECIES**

The DEC has reviewed the State's Natural Heritage records. No records of sensitive resources were identified by this review.

The absence of data does not necessarily mean that rare or state-listed species, natural communities, or other significant habitats do not exist on or adjacent to the proposed site. Rather, our files currently do not contain information which indicates their presence. For most sites, comprehensive field surveys have not been conducted. We cannot provide a definitive statement on the presence or absence of all rare or state-listed species or significant natural communities. Depending on the nature of the project and the conditions at the project site, further information from on-site surveys or other sources may be required to fully assess impacts on biological resources.

### **STATE POLLUTION (SPDES) CONSTRUCTION**

Since project activities will disturb over one acre of land, the project sponsor must obtain coverage under the current SPDES General Permit for Stormwater Discharge from Construction Activity (GP-0-20-001) and develop a Stormwater Pollution Prevention Plan (SWPPP) that conforms to requirements of the General Permit.

As this site is within a Municipal Separate Storm Sewer System (MS4) community, the municipality is responsible for review and acceptance of the SWPPP, and the MS-4 Acceptance Form must be submitted to the Department. For information on stormwater and the general permits, see the DEC website at <http://www.dec.ny.gov/chemical/8468.html>.

## **CULTURAL RESOURCES**

We have reviewed the statewide inventory of archaeological resources maintained by the New York State Museum and the New York State Office of Parks, Recreation, and Historic Preservation. These records indicate that the project is located within an area considered to be sensitive with regard to archaeological resources. The project sponsor should submit project materials to the New York State Historic Preservation Office's online Cultural Resource Information System (CRIS) to initiate the review process. Information on submitting to the system and access to it are available at <http://www.nysparks.com/shpo/>.

## **FEMA FLOODPLAIN**

The project site is located within a Federal Emergency Management Agency (FEMA) Floodplain. The municipality will determine if any additional jurisdictions are applicable to the proposal.

## **AIR RESOURCES**

If the project activities include the installation of a stationary or portable combustion system that exceeds one of the following thresholds, then an air facility registration may be required:

- A maximum rated heat input capacity less than 10 million British Thermal Units (Btu) per hour burning fuels other than coal or wood; or
- A maximum rated heat input capacity of less than 1 million Btu/hr burning coal or wood.

For more information, please contact the DEC Division of Air Resources at (845) 256-3185.

## **OTHER**

Other permits from this Department or other agencies may be required for projects conducted on this property now or in the future. Also, regulations applicable to the location subject to this determination occasionally are revised and the project sponsor should, therefore, verify the need for permits if your project is delayed or postponed. This determination regarding the need for permits will remain effective for a maximum of one year. More information about DEC permits may be found on our website, [www.dec.ny.gov](http://www.dec.ny.gov), under "Regulatory" then "Permits and Licenses." Application forms may be downloaded at <http://www.dec.ny.gov/permits/6081.html>.

Please contact this office if you have questions regarding the above information. Thank you.

Sincerely,  
Christina Pacella  
Division of Environmental Permits

Results are reported on an ``as received`` basis, and are not corrected for dry weight.

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene.

Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

The regulatory hold time for pH is immediately. This pH was performed in the laboratory and may be considered outside of hold-time.

Hexavalent Chromium:

This sample is in a reducing state.

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene.

Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

The regulatory hold time for pH is immediately. This pH was performed in the laboratory and may be considered outside of hold-time.

Hexavalent Chromium:

This sample is in a reducing state.

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene.

Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

The regulatory hold time for pH is immediately. This pH was performed in the laboratory and may be considered outside of hold-time.

Hexavalent Chromium:

This sample is in a reducing state.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

1 = This parameter is not certified by the primary accrediting authority (NY NELAC) for this matrix. NY NELAC does not offer certification for all parameters at this time.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL  
BRL=Below Reporting Level L=Biased Low

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

### **Comments:**

Results are reported on an ``as received`` basis, and are not corrected for dry weight.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

1 = This parameter is not certified by the primary accrediting authority (NY NELAC) for this matrix. NY NELAC does not offer certification for all parameters at this time.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL  
BRL=Below Reporting Level L=Biased Low

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

### **Comments:**

Results are reported on an ``as received`` basis, and are not corrected for dry weight.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

1 = This parameter is not certified by the primary accrediting authority (NY NELAC) for this matrix. NY NELAC does not offer certification for all parameters at this time.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL  
BRL=Below Reporting Level L=Biased Low

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

### **Comments:**

Results are reported on an ``as received`` basis, and are not corrected for dry weight.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

1 = This parameter is not certified by the primary accrediting authority (NY NELAC) for this matrix. NY NELAC does not offer certification for all parameters at this time.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL  
 BRL=Below Reporting Level L=Biased Low J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit  
 QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

### **Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

The regulatory hold time for pH is immediately. This pH was performed in the laboratory and may be considered outside of hold-time.

Hexavalent Chromium:

This sample is in a reducing state.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

1 = This parameter is not certified by the primary accrediting authority (NY NELAC) for this matrix. NY NELAC does not offer certification for all parameters at this time.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL

BRL=Below Reporting Level L=Biased Low LOD=Limit of Detection MDL=Method Detection Limit

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

### **Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

The regulatory hold time for pH is immediately. This pH was performed in the laboratory and may be considered outside of hold-time.

Hexavalent Chromium:

This sample is in a reducing state.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

1 = This parameter is not certified by the primary accrediting authority (NY NELAC) for this matrix. NY NELAC does not offer certification for all parameters at this time.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL  
 BRL=Below Reporting Level L=Biased Low J=Estimated Below RL LOD=Limit of Detection MDL=Method Detection Limit  
 QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

### **Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY 375 soil criteria for chromium are based on hexavalent chromium and trivalent chromium.

The regulatory hold time for pH is immediately. This pH was performed in the laboratory and may be considered outside of hold-time.

Hexavalent Chromium:

This sample is in a reducing state.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Comment:

Additional 8260 criteria: 10% of LCS/LCSD compounds can be outside of acceptance criteria as long as recovery is 40-160%, 25-160% for Chloroethane-HL and Trichlorofluoromethane-HL.

I = This parameter is outside laboratory LCS/LCSD specified recovery limits.

m = This parameter is outside laboratory MS/MSD specified recovery limits.

r = This parameter is outside laboratory RPD specified recovery limits.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

RPD - Relative Percent Difference

LCS - Laboratory Control Sample

LCSD - Laboratory Control Sample Duplicate

MS - Matrix Spike

MS Dup - Matrix Spike Duplicate

NC - No Criteria

Intf - Interference

State: NY

## Sample Criteria Exceedances Report

### GCG08276 - TAYLORD

SampNo	Acode	Phoenix Analyte	Criteria	Result	RL	Criteria	RL Criteria	Analysis Units
CG08282	CR-SM	Chromium	NY / 375-6.8 Metals / Unrestricted Use Soil	30.4	0.36	30		mg/Kg
CG08283	CR-SM	Chromium	NY / 375-6.8 Metals / Unrestricted Use Soil	34.1	0.33	30		mg/Kg
CG08284	CR-SM	Chromium	NY / 375-6.8 Metals / Unrestricted Use Soil	31.0	0.37	30		mg/Kg

Phoenix Laboratories does not assume responsibility for the data contained in this exceedance report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

## Analysis Comments

June 10, 2020

SDG I.D.: GCG08276

The following analysis comments are made regarding exceptions to criteria not already noted in the Analysis Report or QA/QC Report:

### ***PEST Narration***

#### **AU-ECD4 06/08/20-1:** CG08282, CG08283, CG08284

The following Continuing Calibration compounds did not meet % deviation criteria:

Samples: CG08282, CG08284

Preceding CC 608A020 - Endosulfan sulfate 28%H (20%)

Succeeding CC 608A034 - Endosulfan sulfate 24%H (20%)

Samples: CG08283

Preceding CC 608A034 - Endosulfan sulfate 24%H (20%)

Succeeding CC 608A045 - Endosulfan sulfate 25%H (20%)

### ***SVOA Narration***

#### **CHEM34 06/05/20-1:** CG08282, CG08283, CG08284

The following Initial Calibration compounds did not meet recommended response factors: 2-Nitrophenol 0.080 (0.1), Hexachlorobenzene 0.090 (0.1)

The following Initial Calibration compounds did not meet minimum response factors: None.

The following Continuing Calibration compounds did not meet recommended response factors: 2-Nitrophenol 0.082 (0.1), Hexachlorobenzene 0.098 (0.1)

The following Continuing Calibration compounds did not meet minimum response factors: None.

Up to eight compounds can be outside of ICAL %RSD criteria and up to sixteen compounds can be outside of CCAL %Dev criteria if less than 40%.

### ***VOA Narration***

#### **CHEM03 06/07/20-1:** CG08276, CG08277, CG08278, CG08279, CG08280, CG08281

The following Initial Calibration compounds did not meet RSD% criteria: 1,2-Dibromo-3-chloropropane 29% (20%), Acetone 24% (20%), Bromoform 34% (20%), Chloroethane 25% (20%), Dibromochloromethane 22% (20%), trans-1,4-dichloro-2-butene 26% (20%)

The following Initial Calibration compounds did not meet maximum RSD% criteria: None.

The following Initial Calibration compounds did not meet recommended response factors: Acetone 0.085 (0.1), Acrolein 0.034 (0.05), Bromoform 0.099 (0.1), Tetrachloroethene 0.187 (0.2)

The following Initial Calibration compounds did not meet minimum response factors: Acrolein 0.034 (0.05)

The following Continuing Calibration compounds did not meet recommended response factors: Acrolein 0.026 (0.05)

The following Continuing Calibration compounds did not meet minimum response factors: Acrolein 0.034 (0.05)

Up to eight compounds can be outside of ICAL %RSD criteria and up to sixteen compounds can be outside of CCAL %Dev criteria if less than 40%.

## NY Temperature Narration

June 10, 2020

SDG I.D.: GCG08276

---

The samples in this delivery group were received at 1.6°C.  
(Note acceptance criteria for relevant matrices is above freezing up to 6°C)

# PHOENIX
